

INDOOR WATER-FED WINDOW CLEANING INSTRUCTIONS

1. Components

- X-ION 20L Spray Pack with a Length of 8mm(ID) Pole Tube
- Telescopic Pole with Pole Tip Adapter
- Trigger Assembly
- Gardiner Pad Holder and Microfibre Pads
- Please check all above parts are present before assembly

2. Setup Instructions

1. Fill the Spray Pack with Purified Water, a few litres should be plenty.
2. Connect the pole tube to the spray pack Push-Fit fitting
3. Attach the Spray Trigger to the pole using the included Mount and Velcro Straps
4. The pole tube from the Spray Pack connects to the bottom inlet of the trigger, another length of pole tube connects from the outlet of the spray trigger, up the pole to the Quick-LoQ Tip
5. Connect the Gardiner Pad Holder and Microfibre Pad to the Quick-LoQ Tip
6. Test the water pressure and adjust for optimal amount of misting
7. You are now ready for cleaning

3. How To Use

1. Extend the pole so the Pad Holder reaches the top of the glass.
2. Hold the Pad Holder near the top of the glass and press the trigger briefly to mist a small amount of water onto the glass.
3. Wipe the sprayed area with the Pad Holder to clean.
4. Work in small, manageable sections, letting the glass dry slightly before moving on
5. Clean each section across at the same height, then move down to the next level.

4. Cleaning Tips

- Use the system regularly to prevent heavy buildup on glass.
- For very dirty glass, start with a wet pad to loosen grime, then switch to a fresh dry pad to polish.
- For light or regular cleaning, a lightly damp pad is usually enough for a single quick polish.
- We recommend setting the spray pack on the ground so the user is not carrying unnecessary weight
- Practice on lower windows first before tackling glass at height.
